

LABELS AND DECALS

Product Sheet

Reid Print Technologies handles a variety of label projects and materials. Our range of materials include; standard label materials, full range of MacDermid Autotype Polyester Films, Polycarbonates, Acrylics and specialty fire retardant materials suited for defence and aerospace industries.

LENSED LABELS

Gives a 3-D appearance as they are made with a high-gloss, crystal resin finish.

Some Uses include:

- Custom name badging
- Warning labels
- Logo badges

VARIABLE DATA LABELS

Print data varying on each individual label, making each label uniquely identifiable.

Some Uses Include:

- Serial numbers
- Consecutive numbers
- Address data on dispatch labels

We offer a fast production turnaround and lead time. This is due to our advanced pre-press software that allows us to offer a wide range of barcodes, QR codes and complex serial numbering formats. Unlike other systems, we do not require you to supply us with a pre-filled spreadsheet or mail merge. Simply let us know the number range and barcodes required, so then our software can take care of the hard work for you.
