

POSITIVE TEMPERATURE COEFFICIENT HEATER

Product Sheet

Reid Print Technologies is Australia's leading manufacturer for printed electronics, including PTC Heaters. PTC heaters also known as Positive Temperature Coefficient Heater are made to order using various shapes, sizes and configurations

FEATURES

- Self-regulating
- Ultra-thin
- Durability in extreme environments
- Simple uncomplicated integration into existing products
- Made to order offering full customization
- Low cost
- Battery operated

APPLICATIONS

- Industrial
- Medical and Healthcare
- Automotive
- Mining
- Aerospace
- Sports and Recreation
- IoT
- Apparel
- Wearable Technology
- Devices and Equipment

PTC Heaters are a flexibly printed heater that can be transferrable onto any textile or garment as well as PET substrates. PTC Heaters are made through electronic print, utilising specialised inks to create the enhanced performance of the print.

These heaters are commonly used in apparel application for the use of heating specific clothing items or enhancing product features on devices. PTC heaters are also commonly used in lifestyle apparel such as heated jackets and boots for winter sports, as well as devices such as breathalysers.
