

REID

PRINT TECHNOLOGIES

Over 30 Years of Expertise

Our team develops innovative solutions for wearable technology, medical devices, and industrial applications.

Who we are

Since 1988, we have been one of Australia's leading manufacturers of printed electronics. With over 30 years of expertise, our in-house R&D team develops innovative solutions for wearable technology, medical devices, and industrial applications. We can help you bring new technologies to market faster.

What we do

- Luxury super-yacht dashboards
- Aerospace defence transit cases
- Cardiac simulator pressure sensors
- Electrodes for artificial insemination devices
- Mining safety monitoring systems
- Temperature sensors for health monitoring suits
- Control interfaces for EV chargers

End-to-End Capabilities

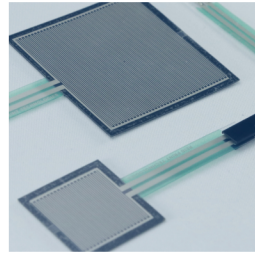

We make printed components into certified, intelligent, and compliance-ready platforms.

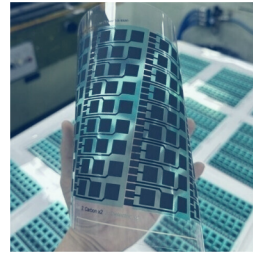

**Wearable
Sensors**

**Screen
Printing**

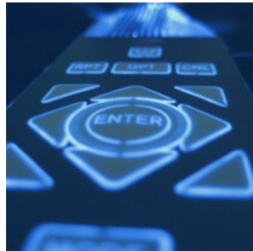

**NFC Tags
& Antennas**

**Rapid
Prototyping**

**Flexible
Electronics**

**Membrane
Keypads**

**Complex User
Interfaces**

**Custom Labels
& Decals**

Our industry solutions

- In-house research and design, engineering, integration, and product assembly
- Highly sensitive and classified work capabilities
- Circuit design, microchip mounting, and printing design on flexible substrates
- Large format industrial digital printer
- Co2 laser cutting, CNC router, die-cutting and embossing services
- Fully integrated back-lighting and proximity sensors for HMI's
