Conflict Minerals Policy Statement

Revision 1 | Issue date: July 2026 | Review: annual

Reid Print Technologies is committed to the responsible and ethical sourcing of the materials and components used in the manufacture of our products. This statement sets out our position on the sourcing of conflict minerals.

We recognise the concern surrounding the mining and trade of certain minerals, specifically tin, tantalum, tungsten and gold (collectively referred to as 3TG, or conflict minerals), in the Democratic Republic of the Congo and adjoining countries, where their extraction and trade can directly or indirectly finance or benefit armed groups and contribute to human rights abuses.

Our commitment

- We support the goals and objectives of Section 1502 of the US Dodd-Frank Wall Street Reform and Consumer Protection Act, and the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.
- We do not knowingly procure materials or components containing 3TG that originate from mines or smelters known to fund or support armed conflict.
- We expect our suppliers to source materials responsibly, to avoid conflict-affected sources, and to exercise appropriate due diligence over their own supply chains.
- We expect suppliers, on request, to provide completed Conflict Minerals Reporting Template (CMRT) declarations identifying the smelters and countries of origin of any 3TG contained in the products they supply to us.
- Where a supplier is unable or unwilling to demonstrate a responsible, conflict-free supply chain, we will take appropriate action, up to and including a review of that supplier relationship.

Scope and review

This policy applies to all materials and components procured for use in Reid Print Technologies products. We review this statement periodically, and at least annually, and update it as our supply chain and the applicable standards evolve.

Approved on behalf of Reid Print Technologies

Clem Johnson
Director
Reid Print Technologies

Reid Print Technologies is certified to ISO 9001 and ISO 13485 and is JOSCAR registered.
